

Informed vaccination decision

place

date

I,

name

- * Considering that the current Sars-Cov-2 variants pose few health risks to me; **1**
- * Considering that I have built up sufficient natural immunity due to previous Sars-Cov-2 infection(s); **2**
- * Considering that I have built up sufficient immunity through previous corona vaccinations, and that every vaccination increases the risk of side effects; **3**
- * Considering that the current mRNA corona vaccines are poorly studied for effectiveness against serious illness, long Covid or death; **4**
- * Considering that research shows that mRNA corona vaccines provide little or no protection against virus transmission of the current variants; **5**
- * Considering that research now shows that mRNA corona vaccines have serious side effects at a frequency of at least 1/800; **6**
- * Considering that mRNA corona vaccines can cause serious heart damage; **7**
- * Considering that mRNA corona vaccines have been found to induce signals of heart damage at a frequency of 1/35; **8**
- * Considering that no independent, randomized, placebo-controlled long-term studies have been conducted on the safety of mRNA corona vaccines, including for pregnant women and the (unborn) child; **9**
- * Considering that there is still unexplained excess mortality that may be related to corona vaccines; **10**

*check where applicable

Have decided to be vaccinated / not be vaccinated** with the current mRNA corona vaccines.
